Subject: Microsoft Settlement

I do not believe that the settlement goes far enough in guaranteeing a competitive marketplace. I think MS has some terrific products, but I also know that they could, and would, do a much better job if they faced real competition, competition which has been severely hampered by the current environment.

As a U.S. citizen I am commenting that I believe that money talked in creating this settlement, and that the best interests of the country have not been served.

I would like further review, and some significant changes in protections for smaller competitors, and for other operating systems to explicitly run MS products.

Best regards,

Clark Elliott
